neighbor

- 1 Thread the umbrella shaft until tight. Then set everything aside on a soft surface, like a rug.

- 2 Insert the finial through the canopy's eyelet.

- 3 Flip the canopy over so that the hook-and-loop strips are faced upward.

- 4 With help from someone else, thread the finial into top of the umbrella.

- 5 Flip the canopy cover and tighten the finial fully.

- 6 With help from someone else, stand the umbrella up. Then begin fitting ribs into the rib tabs on the canopy. Repeat for all tabs.

- 7 Ensure all ribs fit into tabs on the canopy.

- 8 Connect the corresponding hook-and-loop strips underneath the canopy. You're finished!
