

Twofold Coffee Table

neighbor

Description

Twofold is a fully aluminum outdoor coffee table that hinges off a clever idea: let material and mechanism do all the work. The result is sculptural, industrial, and a little unexpected. Sized to sit low between lounge chairs or in front of a sofa, with a generous top for drinks, food, and the things that pile up by evening. Powder-coated finish, marine-grade hardware, and available in colors that pair easily with the rest of the line. Built to stay outside year-round.
