

Up Down Chair

neighbor

Description

Meet Up Down, a lounge chair that rethinks comfort outdoors. Built without cushions, it combines a powder-coated aluminum frame, solid teak arms, and a fade-resistant Sunbrella® stretch strap to create a supportive seat with a subtle, responsive give.

The pre-tensioned weave moves with you—flexing just enough to feel relaxed, without ever losing its shape. The result: a softer seat, without the soft parts.

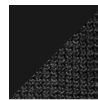

Available on its own or paired with a matching ottoman.

Materials & Specifications

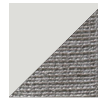

- Powder-coated aluminum frame
- Sunbrella® stretch strap
